

PRESS RELEASE

ErgotronHome™ Workspace Desk35 Multi-Purpose Sit-Stand Desk

Standalone sit-stand desk looks great in an office or anywhere within the home

St. Paul, MN, July 27, 2016 — [ErgotronHome](#), an Ergotron, Inc. brand of style-driven products designed to bring added purpose to work areas at home, today introduced the Workspace™ Desk35, its latest sit and stand option for the home.

In the age of mobile technology, people still need desks at home for a variety of tasks and projects. The Desk35 combines two sought-after areas of the home: the kitchen counter and the kitchen table, giving users the height and space advantages of each in a freestanding form. Whether to work, learn or play, the Desk35 can be adjusted for sitting or standing, allowing people to interact with their technology at home in a more comfortable, healthy and productive way. Whether it is used as a workstation in a home office or something more unique in a bedroom, kitchen or craft room, the Desk35 provides a stable workspace for a laptop, tablet or a variety of entertainment uses.

“It can be easy to lose track of time at home and end up spending too much time sitting,” said Kevin Paulson, director of product management, ErgotronHome. “With the Desk35, you don’t have to sacrifice your active lifestyle. With a simple adjustment you can break up sitting time while still retaining your focus and your energy levels.”

The generous 35" wide x 25.25" deep (88.9 x 64.1 cm) work surface has an attractive Hazelnut laminate finish. Adjustment is managed through a simple hand-brake lever that offers a wide range of adjustments for users to comfortably sit and stand. Cables are managed at the back of the support post for a clean, finished look.

-more-

The Workspace Desk35 is easy to install—no tools or adjustments needed. It retails for US \$499.95 and will be available for purchase in August 2016 in the U.S. and Canada. Consumers can sign up for product availability alerts on www.ergotronhome.com. For more information call 844.236.7234 or follow ErgotronHome on Twitter, Facebook, YouTube and Pinterest.
